

## Environmental Education

Learners from grade 6 to grade 12 have access to fantastic programmes at the Aquarium. From job-shadowing and volunteering to preparing for finals and finding resources and links for a great project, you'll find what you need here.

The Aquarium's Environmental Education Centre also has over ten years of experience in adult education. We offer custom-designed courses, focusing particularly on the marine and coastal environment, for both private and government sectors. Over the years we have presented courses to a wide range of groups including Coastcare workers, the Cape Tour Guides Association, SANParks compliance officers, the Sharkspotters, students from the University of Cape Town and the Cape Peninsula University of Technology (CPUT), teachers from schools around the Peninsula, and members of the public as part of our volunteer training programmes.
